

QUALITY POLICY STATEMENT

IKAD Engineering Pty Ltd mission is to provide goods and services which consistently meet or exceed our Customers' specified needs and expectations.

IKAD Engineering Pty Ltd is a mechanical engineering contractor operating in Australia's largest industries including Defence, Oil and Gas, Resources, Construction and Commercial Marine. IKAD Engineering provides a holistic approach that represents the synergy of professionalism and experience to a high level of customer satisfaction.

IKAD Engineering Pty Ltd shall establish and sustain a Quality Management System to achieve our mission in accordance with the requirements of the latest version of AS/NZS ISO 9001 and ISO 17025 etc. IKAD works entirely to our client/industry specifications and requirements.

The purpose of the IKAD Engineering Quality Management System is to define long terms goals and plans and provide a frame work and an environment for every employee to take ownership of customer satisfaction through a sense of collaboration and motivation.

IKAD Engineering Pty Ltd believes success is achieved by:

- Establishing and reviewing quality objectives.
- Ensuring all personnel are familiar with the requirements of the Quality Management System and the application and implementation of the associated quality documentation
- Creation, implementation and review or a Quality Management System incorporating documentation and procedures that are communicated and understood at appropriate levels/functions.
- Striving to excel in everything we do and embracing continuous improvement and innovation of management, planning, training, monitoring, inspecting and verification systems.
- Management and employees being fully committed to the successful implementation and maintenance of the Quality Management System and the requirements of the Standards upon which our systems are based.
- Commitment to comply with all applicable legislation, regulation, standards and codes of practice.

IKAD Engineering shall review and amend its Quality Management System on a regular basis ensuring that it remains effective, relevant, and appropriate to our business and in accordance with ISO 9001.
