*Dear Sir,*

## SUPPORT FOR A RECENT SASR EXERCISE

From Friday 14 Oct 11 until Mon 17 Oct 11 SASR personnel conducted a series of exercises at RAAF Base Pearce using the Aircraft Mockup. This exercise activity was significantly important as it was associated with CHOGM preparations.

As the Mockup is currently undergoing substantial remodeling, which will result in an A380 configuration, the exercise timing demanded that the main deck and various mechanical components of the Mockup be the subject of an accelerated programme of works. Such works were to ensure that the Mockup could be towed and it was in a suitably finished state for the intended exercise purpose.

I wish to commend the efforts of IKAD Engineering, in particular Mr Wayne Redfern and his supporting staff, in delivering IKAD's element of this endeavour successfully and co-operating to the fullest with the other contractors and consultants. Your support to the Regiment is appreciated.

*With Dares Mine,*

**J.C. BEESLEY, DSM**  
Lieutenant Colonel  
Commanding Officer
