**SILVER LEVEL**

**NATHAN ANDREW MILES**

**IKAD ENGINEERING  
ANZAC SYSTEMS PROGRAM OFFICE**

*I commend you for your tireless and exemplary performance in carrying out your responsibilities as a Project Manager and Team Leader in support of ANZAC Class Frigates over many years. Specifically, I note your support to HMAS Arunta where you and your team deployed to the Guam Naval Base to conduct rectification repairs on an urgent defect to the port propeller shaft mount. Your contribution to this repair and the close collaboration with Ship Staff and ANZAC SPO enabled HMAS Arunta and her crew to remain engaged with the Australian Task Group deployed on important government directed operations.*

*You have displayed exceptional devotion to duty, project management skill and persistence in overcoming constraints imposed by the COVID-19 Pandemic to achieve this repair. Working under significant time pressures and difficult conditions during and following the repair, you have applied yourself diligently to all tasks, ensuring the timely repair to the port "A" bracket bearing.*

*Your achievements are of the highest order and are in keeping with the finest traditions of the Royal Australian Navy and Australian Defence Industry.*

**W.A. Malcolm** CSM, RAN  
Rear Admiral  
Head Maritime Systems  
Capability Acquisition and Sustainment Group  
Department of Defence
